

BLUE SEA SYSTEMS ADDS KEY LEADER TO ENGINEERING DEPARTMENT
Graham Brings Expertise, Leadership and Bi-Lingual Capabilities to Blue Sea Family

Blue Sea Systems, Inc. has added an important new member to its engineering department, strengthening its position as a leader in the development of innovative and marine electrical products. David Johnson, Vice President of Sales and Marketing for Blue Sea Systems, announced the new appointment.

Eric J. Graham is an accomplished electro-mechanical engineer who brings a wealth of relevant experience to his new post at Blue Sea Systems. Graham has advanced technical knowledge of many subjects including circuit protection, electronics packaging, thermal/fluid dynamics and conduction heat transfer. Graham's technical work experience includes leading engineering teams in the design and analysis of products such as circuit breakers, busway systems and power/digital electronics packaging.

"We are truly fortunate to have Eric join the Blue Sea Systems family," said Johnson. "He has the ideal combination of engineering expertise and leadership that will help us meet the challenges of the future. Eric also speaks fluent French, a talent which will allow him to spearhead several important projects we have in the works with premium boat manufacturers in France," added Johnson.

Prior to joining Blue Sea Systems, Graham spearheaded engineering efforts at a variety of high-tech manufacturers. Most recently, Graham served as an Engineering Manager at Siemens Energy & Automation in Norcross, Virginia. His lengthy list of career accomplishments also includes engineering leadership positions at DRS-Electric Power Technology, Tenor Networks, Lucent Technologies and General Electric-ED&C. He holds six U.S. Patents, has received numerous managerial awards and was honored with a National Defense Service Medal. In addition, Graham is an officer in the U.S. Naval Reserve Civil Engineering Corps, Naval Mobile Construction Battalion (NMCB) 24.

In his free time Graham is an avid sailor, fly fisherman and outdoorsman, providing a unique appreciation for the importance of the electrical products Blue Sea Systems designs and manufactures for the marine industry.
