## **Blue Sea Systems' ADD A BATTERY is a Complete Two Battery Bank Management System**

Boaters wanting to upgrade from a single battery bank system to a two battery bank system, or wanting to improve their current two battery bank system, can do so with ease. Blue Sea Systems' ADD A BATTERY Dual Circuit System provides the power of two great products in one package. It contains the components needed to manage a two battery system—the e-Series, Dual Circuit Plus™ Battery Switch simplifies switching, and the 120 Amp SI (Starting Isolation) Automatic Charging Relay (ACR) automates charging.

The Dual Circuit Plus™ Battery Switch switches engine and house circuits simultaneously while maintaining isolation between them. Isolation between start and house circuits minimizes the risk of a dead start battery. The additional "Combine Batteries" function offers the ability to combine two battery banks in the event of a low start battery. The Dual Circuit Plus™ Battery Switch earned the IBEX innovation award when it was introduced in 2005.

The 120 Amp SI ACR automatically combines battery banks during the charging cycle so that a charge applied to one battery bank is shared with the second battery bank. It then isolates batteries during engine cranking and when not charging. This temporary isolation of house loads from the start circuit during engine cranking protects sensitive electronics from sags and spikes. The 120 Amp SI ACR is suitable for high-output charging systems up to 120 Amperes.

Blue Sea Systems' marine electrical products are built to last. The company was founded in 1992 based on a commitment to create innovative high quality marine electrical products designed to improve the safety, simplicity, and reliability of boating. Blue Sea System employees are active boaters who apply their passion to designing, developing, and building great products that will enhance the experience of boaters.

For more information on this or any other product information, please contact Blue Sea Systems at 800 222-7617, or visit their website at [www.blueseasystems.com](http://www.blueseasystems.com).
