FOR IMMEDIATE RELEASE

BLUE SEA SYSTEMS EARNS SPECIAL RECOGNITION FOR NEW SAFETYHUB²⁵⁰

Innovative product increases the safety and reliability of a boat's electrical system

BELLINGHAM, WA --- (October 23, 2009) Blue Sea Systems, a Bellingham based manufacturer of marine electrical systems, has earned an honorable mention for its new SafetyHub²⁵⁰ at the 2009 International Boatbuilders' Exhibition and Conference (IBEX) in Miami, FL last week.

Judges based their decisions on the product's innovation and benefit to the marine industry and consumers.

"The selection of the SafetyHub²⁵⁰ for honorable mention for the IBEX Innovation Award demonstrates this product's significance to the marine market," said Scott Renne, President of Blue Sea Systems. "The SafetyHub²⁵⁰ provides boatbuilders, installers, and boaters a compact and cost-effective solution for circuit protection and battery switching needs."

The SafetyHub²⁵⁰ combines an ignition protected fuse block with a remote battery switch and integrated connecting plugs. It consolidates up to seven circuits from 1A – 200A, eliminates loose wires, protects fuses from explosive fumes, and provides main battery shutdown from a safe location. The SafetyHub²⁵⁰ is ideal for vessels ranging from ski boats to offshore fishing boats.
