Blue Sea Systems Promotes Eric Graham to Engineering Manager

Blue Sea Systems is happy to announce the promotion of Eric Graham to the position of Engineering Manager. According to Scott Renne, President of Blue Sea Systems, "In addition to developing several highly successful product lines for Blue Sea Systems, Eric has demonstrated outstanding initiative and talent in organizing systems for improving the product development process at Blue Sea Systems."

Eric has been employed at the company since September of 2004. During that time, he has directed the design and development of several products: the m-Series line of battery switches including the award-winning Dual Circuit Plus™, the HD-Series line of battery switches, several automatic charging relays including the award-winning 120 Amp SI-Series Automatic Charging Relay, and the soon-to-be-released ML-Series Automatic Charging Relay and its companion product the ML-Series Remote Battery Switch.

Eric holds a Masters degree in Mechanical Engineering from Rensselaer Polytechnic Institute, and a Bachelors degree from Worcester Polytechnic Institute. He holds seven U.S. Patents. In his free time Graham is an avid sailor, fly fisherman and outdoorsman, providing a unique appreciation for the importance of the electrical products Blue Sea Systems designs and manufactures for the marine industry.

Blue Sea Systems was founded in 1992 based on a commitment to create innovative high quality marine electrical products designed to improve the safety, simplicity, and reliability of boating. Blue Sea Systems employees are active boaters who apply their passion to designing, developing, and building great products that will enhance the experience of boaters.
