Blue Sea Systems' m-Series (Mini) Battery Switch

Blue Sea Systems announces a new line of battery switches. The m-Series Battery Switch is a great choice for most boaters because of its four practical models, flexible mounting and configuration options, small size, and current-carrying capacity.

The switch is available in four models: Single Circuit ON/OFF (knob or key version); Selector 1/2/1+2/OFF; Dual Circuit Plus™; and Dual Circuit™. The innovative new Dual Circuit™ and Dual Circuit Plus™ Battery Switches provide Engine and Start battery isolation. Battery isolation protects the Start battery from being discharged by House loads, preserving it for starting the engine. Battery isolation also protects sensitive electronics from voltage spikes and sags that may occur during engine starting.

Because of its small size and flexible mounting options, this Battery Switch can be installed in many situations. The m-Series switch is ideal when there are space constraints—it will fit into a space 3" X 3" (7.6cm X 7.6cm). The case design allows for surface mounting, front-panel through-hole mounting that is self-trimming, and rear-panel through-hole mounting. A removable snap-on rear-cover and sliding isolator covers protect rear contacts—remove only the isolator cover required to make connections. The rear cover can be attached in any of the mounting configurations. The knob is removable in the OFF position for service lockout, and is positively retained in other positions.

The small size of the Blue Sea Systems' m-Series Battery Switch is deceiving. It has high current-carrying capacity—300 Amperes continuous rating suitable for outboards and small inboard gasoline engines and 20 percent higher than other larger switches on the market.

Blue Sea Systems was founded in 1992 to create high quality marine electrical products designed to improve the safety, simplicity, and reliability of boating. The people who work at Blue Sea Systems are active boaters that apply their passion to developing products that will enhance the experience of boaters.
